Patent No. 6762043

GENERAL INFORMATION:

APPLICANT: Beraud, Christophe
TITLE OF INVENTION: No. 6762043el motor proteins and methods for
TITLE OF INVENTION: their use
FILE REFERENCE: 1044

CURRENT APPLICATION NUMBER: US/10/093,317

CURRENT FILING DATE: 2002-03-06

PRIOR APPLICATION NUMBER: 09/724,224

PRIOR FILING DATE: 2000-11-28

NUMBER OF SEQ ID NOS: 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      4; Length 1115;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Indels

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 1, Application US/09724508
; Sequence 1, Application US/09724508
; Patent No. 6368841
; GENERAL INFORMATION:
; APPLICANT: Beraud, Christophe
; APPLICANT: Beraud, Christophe
; TITLE OF INVENTION: No. 6368841el motor proteins and methods for
; TITLE OF INVENTION: their use
; TILE REFERENCE: 1045
; CURRENT APPLICATION NUMBER: US/09/724,508
; CURRENT FILING DATE: 2000-11-27
; PRIOR PAPLICATION NUMBER: 09/621,233
; PRIOR PILING DATE: 2000-07-21
; SOFTWARE: PRESENCE for Windows Version 4.0

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSFORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, doubble-strand cDNA was digested with Not I and cloned into the Not I and EcoR v sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

Submitsed (20-JUL-2004) Genoscope - Centre National de Sequencage : Submitted (20-JUL-2004) Genoscope - Centre National de Sequencage : BP 191 91006 EVRY cedex - FRANCE (E-mail : seqref@genoscope.cns.fr - Web : www.genoscope.cns.fr | 18t strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoN with sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitogen.
